

COMPANYPROFILE

About Us

Background

Who is Bambata Engineering CC

Bambata Engineering CC is an engineering services company that has established a reputation of service excellence for itself. It was founded by Mr. Sibusiso Baartman in 2008, who is currently one of the Managing Director thereof and was later joined by Mr. Dumisani Mgweshe. Both Mr. Baartman and Mr. Mgweshe have, over the years, accumulated vast wealth of experience in Engineering and Project Management and remains 100% black owned. The company operates throughout the country and has implemented various engineering projects in Gauteng, Western Cape, Limpopo, and Eastern Cape. Bambata Engineering, thus, has an extensive experience in a diverse range of electrical and mechanical and civil engineering domain.

Our technical capability and capacity allow the company to provide its engineering services to clients expeditiously whilst maintaining a high level of quality, transparency and professionalism. Bambata Engineering CC is committed to taking its customers to greater heights through applying our extensive experience in Construction, Project Management, including Electrical, HVAC and Plumbing. The Directors have more than forty (40) years of senior management experience in Construction, Project Management.

Bambata Engineering was initially involved in the design and project management of the refurbishment of the 166kV/22kV Nelspruit Substation in 2006 which included transformer and control panel upgrades. Subsequently Bambata Engineering CC became dormant due to the Directors involved on other major initiatives. Bambata Engineering CC started operating in earnest again in 2021.

Bambata Engineering CC has amassed experience in the construction industry in diverse engineering fields from housing construction through substation construction to the mega projects such as Gautrain construction and maintenance.

Meet our Directors

Sibusiso Baartman holds a Science degree as well as an Electrical Engineering degree, as well various business management qualifications. He has been involved in various projects as Project Engineer, recently as a M&E Manager in the construction of the Amazon Data Centre (Cloud Platform) in Cape Town. Other recent projects include the Mechanical, Electrical, Plumbing and Drainage (MEPD) Manager in the construction of the Campus Student Residence to the value R200m, MEPD Manger in the construction of the Bay West Mall in Port Elizabeth (now Gqeberha) to the value of R1 billion), M&E Manager in the Construction and Maintenance (Gautrain to the Value 22billion), Project Manager in various Capital Projects including customer connections at City Power (Johannesburg), as well as Design & Project Engineer in various Electrification Projects in Gauteng, Free state and North-West provinces.

Dumisani Mgweshe, holds a Science degree, an Electrical Engineering degree, as well numerous post. graduate qualifications in business management including a Master's degree in Business Leadership (MBL) and has been involved in various projects as a Project Engineer and Maintenance Manager in the Steel Manufacturing Sector, a Senior Project Executive in the Mining Sector as well Head of Department (Project Management) at Transnet Engineering, a Division of Transnet SOC. As senior and head in the project management space in both private and public sector, he has overseen capital investment initiatives of multibillion over the past two decades across South Africa and beyond.

OUR MISSION

- To develop lasting customer relationships that deliver excellent value through engaging with proven performance and reliability driven technical partners; thereby delivering quality and reliable business services that have sustainable value.
- To utilize technology investment through unlocking construction process value.
- To explore, challenge status quo while applying best engineering practices in greener human advancement and business services to the benefit of our clientele and society at large.

OUR VISION

- To be a leading Engineering Services Company offering all technical solutions in Construction (New Projects) and Maintenance (Existing Infrastructure)

OUR VALUES

- Integrity, Transparency and Professionalism
- Quality and timeous service
- Innovation
- Mutual respect of our clients

OUR PRODCUTS AND SERVICES

Bambata Engineering CC portfolio of offerings consists of broad spectrum of legal services which cover the following areas broadly:

Electrical Engineering Services

- Electrical Designs and Development of Specifications.
- New Construction Projects (Medium Voltage and Low Voltage) – Substations, Mini-Substations including Back-Up Generators and Switchgear
- Refurbishment and Upgrade of existing electrical infrastructure across the voltage spectrum
- General Maintenance and Service of electrical infrastructure

Alternative Power Supply Systems

- **Design and Installation of Alternative Power Sources (SOLAR SYSTEMS) for household and business centres:**
 - Hybrid Solar Power Systems
 - Off-Grid Solar Power Systems
 - Bi-directional Systems (Tied) – Subject to applicable By-Laws
 - General Refurbishment and Maintenance of Solar Installations
- **Design and Install Alternative Power Sources (Generators) for households and business centres**
 - System design and Installations of Power Generators
 - General Refurbishment and Maintenance of Generator Installations

Mechanical Engineering Services

- Heating, Ventilation and Air-Conditioning (HVAC) new installations
- Upgrade and Refurbishment of existing HVAC installations
- General Service and Maintenance of HVAC installations

Building and Construction (Plumbing Services)

- New Plumbing Installations
- General Maintenance of existing plumbing infrastructure
